### A MEXICAN BAND.

Will Be Procured For Las Vegas

Hon. Felix Martinez, who recently returned from El Paso informed the Rough Rider's committee that owing to the present disorganized condition of the McGinty band at El Paso, it was not likely that it could be secured, but instead, Mr. Martinez offered his ser-vices to the committee to undertake to secure for the occasion the world celebrated Chihushua band which took first prize at the World's Fair, Chica-

Mr. Martinez was accordingly delegated by the committee to take charge of the matter of securing the band, and was also delegated to present to Gov-ernor Ahumada of the state of Chihuahus, Mexico, an invitation from this city, and that Governor Otero be requested to add his official invitation urging his attendance to the reunion festivities. A vote of thanks was ten-dered Mr. Martinez for his proposed services. - Journal-Democrat.

### Women's Club.

It is only a little more than thirtyone years since Sorosis, the mother clubs, was organized in New York, Within the brief period of three de-cades the club idea has expanded until it has became international in influence and universal in adoption. The conferences of the council of the General Federation of Women's clubs now being held in Philadelphia indicate the numerical strength to which the movement has attained and the farreaching swav of its activities.

The federation has linked together in organic unity 2,120 clubs which are registered in America alone. These represent fully 200,000 women of the United States. In addition there are clubs in Europe, South America and Australia which belong to the federa-

But not in the point of numbers only has the development been conspicuous-ly successful. The reception which the elegates of the federation received in Philadelphia yesterday is significant of the changed attitude of the popular mind toward the woman's club. When Sorois was organized in 1868 it aroused a storm of protest and censure. Alice and Phoebe Carey, Jennie, June, Kate Field and others of its organizers were mercilessly caricatured. They were depicted in cartoons with feet on the table surrounded by bottles and glasses and clouds of tobacco smoke. Today the inspiring record which is presented by the General Federation of Women's clubs demonstrates that the club idea among women of intelligence has city today on his way to New York come to stay, and that whatever prejudices against it will be soon dispelled. The great movement among women for organization is one of the conspicuous signs of the times, and it has helped much to enlarge and dignify woman's sphere.-Exchange.

Geyser That Keeps Exact Time. One of the most curious clocks in the world is that which Amos Lane of

Amidee Nev., constructed some time igo. The machinery, which is nothing but a face, hands and lever, is connected with a geyser, which shoots out an immense column of hot water every thirty-eight seconds. This spurting never varies to the tenth of a second. and therefore a clock properly attached to it cannot fail to keep correct time. Every time the water spurts up it

Poor Food Inspection. A physician writing in the Medical Record remarks that the public now so much interested in canned beef for the army seem to forget the extent to which food adulteration affects civilians. The use of boratic and salicylic acids to prevent decomposition is harmful to digestion and ought to be prohibited. In any case, canned beef is a small item compared with the general subject of adulteration. The inspection of food supplies of all kinds is far more effective in England than in America.

> Cost of Burning a Heretic. In the course of an article sketching the histories of some early English ecclesiastics, a writer in the Windsor Magazine, London, tells what it costs to burn a heretic. Texas Sends Cotton to Japan Texans recently shipped their first

cargo of cotton for the Japanese markets. It consisted of 13,832 bales and was loaded on the Japanese steamer Tamba Maru. She is said to have been the first vessel ever loaded at a gulf port for Japan, and will go by way of the Suez canal to Kobe, Yokohama and Nagasaki. Englishmen command the vessel, but her crew is made up entirely of Japanese.

### Brotherly Love in the Philippines. A writer who is familiar with life in

the Philippines, says "Filipino" means person of pure Spanish extraction born in the Philippine islands. The people of mixed blood are Mestizos. while the Spaniards call the aborigines 'Indians." The same writer says the Indians of Luzon hate those of Panav. while both are cordially hated by the Mahometans of Mindanao.

### Tongues of the Cat Family. The tongues of the cat family are

covered with recurving spines. In the common domestic cat these are small, but sufficiently well developed to give the tongue a feeling of roughness. But in the lion and tiger the spines are strong enough to enable the animal to tear away the skin of a man's hand merely by licking it.

## Prayers for a Dangerous Mission.

At some ports in the kingdom prayers are offered for the safety of the crew of outgoing vessels. And, amid the giggling of some, they prayed accordingly.-London Chronicle.
